---

Does the U.S. still lead the world in research and development?

How competitive are China and India?

How has the recession impacted global investment in R&D?

Where does U.S. industry stand when it comes to investing in R&D to remain innovative?

Come get answers to these and many more questions and learn about global R&D trends as representatives from Battelle and R&D Magazine discuss the results of their recently released annual R&D funding forecast for 2011. Also, learn about global R&D trends for a number of specific industries, including:

- Life Sciences
- Information Technologies
- Electronics and Computers
- Aerospace, Defense, and Security
- Energy
- Advanced Materials
