

The Coalition for National Science Funding
and the National Science Foundation

Present

NSF: Investing in America's Future

A Congressional Luncheon Briefing
in conjunction with the House Research & Development Caucus

Opening Remarks:

**Rep. Judy Biggert (R-IL) and
Rep. Rush Holt (D-NJ)**

Introduction:

**Dr. Thomas W. Peterson
Asst. Director for Engineering
National Science Foundation**

Guest Speakers:

**Dr. Erin Santini Bell
University of New Hampshire**

**Dr. Laura Landweber
Princeton University**

Demonstration:

NSF's *SEE* Innovation Website

CNSF

COALITION FOR NATIONAL SCIENCE FUNDING

**Thursday, June 24, 2010
12:00 – 1:30 pm
The Gold Room
(RHOB, Room 2168)**

Innovation is the engine of the American economy, and basic research is the foundation for innovation. The National Science Foundation (NSF) is the leading federal agency supporting basic research and education at the frontiers of all fields of science and engineering. NSF-supported research has fueled innovations ranging from DNA-evidence techniques to functional magnetic resonance imaging (fMRI), and from fiber optics to renewable energy sources. Every dollar invested in NSF is a dollar invested in job creation, economic growth, and our nation's future prosperity.

Please join us for this presentation on NSF's role in the innovations that fuel our nation's growth in productivity and improved quality of life.

RSVP by June 21 to amsdc@ams.org or call 202-588-1100

This is a Widely Attended Public Event
